

The K1700 was developed in and exclusively for the North American market. Kärcher's product and engineering teams surveyed and spoke to hundreds pressure washer users from coast to coast. They learned that North American customers want pressure washers that are easy to set up and use, offer high tech cleaning power and are backed by a solid warranty. As a result, the K1700 was developed to offer unrivaled performance and convenience at a very attractive price. This model delivers 1700 PSI of TruPressure cleaning power, ensuring you get the pressure stated on the box. It includes advanced convenience features such as a unique on/off foot switch, a large storage bin, a removeable detergent tank, three spray nozzles (including a turbo nozzle for intense cleaning) and a unique storage system for the electric cord. Metal hose connections and a metal frame make this unit highly durable. Best of all, no tools are needed for assembly - you can set up and start using the K1700 in 5 minutes or less! Backed by a three year limited warranty, you won't find a better pressure washer value on the market.
