

40V MAX* Cordless Tool System

Oregon® 40V MAX* Cordless Tool System

INSTANT START

- No Pull Cords
- No Warm-Up Required
- No Gas-Oil Mixing

ZERO EMISSIONS

- Environmentally Friendly
- No Gas Fumes

COMFORT AND CONTROL

- Ergonomic Design
- Light-Weight and Balanced
- Low Vibration

LESS DOWN TIME

• Fewer Repairs Needed (Compared to Gas Engines)

LOW NOISE

- Significantly Quieter than Gas-Powered Motors
- Silent Between Cuts/Trimming
- Start Early and Work Late

PowerNow[™] Lithium Ion Battery Packs

The Oregon® PowerNow battery platform provides all the power you need to get the job done. Our Battery Packs feature premium cell technology ensuring long run times and an ability to be recharged up to 1000 times. Superior construction makes all our batteries rugged and durable.

PREMIUM CELL TECHNOLOGY

Light-weight premium cells combine reliable performance and energy capacity.

CONSTANT NO-FADE POWER

Maintain constant power through discharge.

RETAINS CHARGE

Retains a charge even after months of storage.

CONSISTENT CAPACITY

Full charge/discharge is not necessary to retain consistent capacity throughout the life of the battery (no memory effect).

\$99

TOOL TIP

Work = Power X Time

Batteries are best measured in Watt hours (Wh) which is the combination of Voltage and Amp hours (Ah). For example, our 40V MAX* 4.0 Ah Battery B600E provides more run time than a 56V 2.0 Ah Battery.

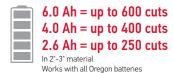

CS300

Self-Sharpening Chain Saw

The CS300 starts instantly and easily cuts through trees and limbs. The brushless motor delivers a powerful combination of speed and torque, and our premium 40V MAX* battery ensures zero emissions. Sharpen the chain in seconds with the built-in PowerSharp® system.

572627	Chain Saw CS300 - Tool Only	\$249
572626	Chain Saw Kit CS300 - E6 2.6 Ah Battery, Standard Charger	\$299
572625	Chain Saw Kit CS300 - A6 4.0 Ah Battery, Standard Charger	\$369
586622	Chain Saw Kit CS300 - R7 6.0 Ah Battery, Rapid Charger	\$449

BUILT-IN POWERSHARP SHARPENING SYSTEM

Sharpen on the saw, and on the job, in seconds.™

HIGH-PERFORMANCE

The CS300's innovative brushless motor delivers high power and torque.

OPTIMAL BALANCE

Weighing only 12 lbs, the CS300 is designed to distribute weight evenly for easy handling.

SPECIFICATIONS

- Brushless motor
- 16" (40 cm) bar length
- Automatic oiler with 4.1 oz tank capacity
- No load chain speed 2796 fpm
- Tool-less tensioner
- Only 12 lbs (with battery)

TOOL TIP

Keep your saw chain tightened correctly

Saw chain will loosen during extended use, so proper saw chain tensioning is a part of regular maintenance. It's important, however, that you never over-tighten the saw chain. Over-tightened saw chain can break and significantly reduce run time and performance. Follow the instructions in your manual to tighten the loosened saw chain. The saw chain is correctly tensioned when you can smoothly pull the saw chain around the guide bar with a gloved hand. The CS300 offers a tool-less tensioning system to make the task simple and fast.

PowerSharp Sharpening System

The CS300 is the only battery powered self-sharpening chain saw available today. With the built-in PowerSharp Sharpening System, there's no more downtime due to a dull chain. Simply pull the lever for 3-5 seconds and the chain works like new. PowerSharp: sharpen on the saw, on the job, in seconds.

The LM300 cuts large grass areas quickly and efficiently. The instant start and 6 adjustable cutting positions allow you to work in every season and on every type of lawn. The brushless motor, battery, and debris bag give you the power and capacity to clear your yard easily and efficiently.

591083	Lawn Mower LM300 - Tool Only	\$199
591082	Lawn Mower Kit LM300 - A6 4.0 Ah Battery, Standard Charger	\$349
591081	Lawn Mower Kit LM300 - R7 6.0 Ah Battery, Rapid Charger	\$419

GREAT FOR SMALL TO MEDIUM YARDS

The LM300 starts instantly and makes cutting time more enjoyable. The brushless motor offers a combination of high-torque and efficiency, offering a quality cut and long run time (up to 7000 ft^2 with a full battery charge).

LIGHT-WEIGHT/OPTIMAL BALANCE

The LM300 is light-weight (only 35.9 lbs with battery) and perfect for mowing around flower beds.

SPECIFICATIONS

- Brushless motor
- 16" (40 cm) cutting width
- 13.2 gal (1.4 bushel) debris bag
- 6 cutting positions
- 35.9 lbs with battery

TOOL TIP

Different mowing patterns can lead to a healthier lawn

Choose different directions to mow your yard. For example, if you mow horizontally one day, mow the same area vertically the next time. This mowing pattern variance will make your grass look better — grass tends to lean in the direction it is mowed. Choosing different mowing patterns will also help reduce soil compaction. The LM300 is a light-weight lawn mower, allowing for easy use and cutting in any direction.

16" (40 cm) cutting width

Easily adjust cutting height

13.2 gal debris bag

Oregon's new LM400 Lawn Mower possesses the power capacity to cut any residential yard. The LM400's tough steel deck gives it the muscular look of a gas mower — without emissions and excess noise. The LM400 can run on only one battery, but it has the capacity for two — which the convenience of extended run time. The LM400 has a vertical storage position, so it will take up minimal space in your garage.

591080	Lawn Mower LM400 - Tool Only	\$299
591079	Lawn Mower Kit LM400 - A6 4.0 Ah Battery, Standard Charger	\$449
59107 8	Lawn Mower Kit LM400 - R7 6.0 Ah Battery, Rapid Charger	\$529
591077	Lawn Mower Kit LM400 - X7 Two 4.0 Ah Batteries, Rapid Charger	\$599

HIGH-PERFORMANCE

Cut more grass with fewer passes. The LM400's brushless motor delivers enhanced torque that allows you to cut high grass and tough vegetation on rough terrain. The LM400's 20" cutting diameter offers a wider cut for larger yards.

3 CUTTING OPTIONS

The LM400 has three convenient cutting options:

- 1. Simply allow yard debris to collect in the provided bag.
- 2. Use the right-side discharge to eject yard debris as you mow.
- 3. Choose the rear discharge option to dispose of grass and yard debris at the rear of the mower. Grass clippings will fall back onto the ground and help reduce your yard's moisture loss.

SPECIFICATIONS

- Brushless motor
- Steel deck
- 20" (51 cm) cutting width
- 15.9 gal (1.7 bushel) debris bag
- 58.8 lbs with one battery
- Vertical storage position
- Dual battery for extended run times
- 6 cutting positions
- Bagging / rear discharge / side discharge

TOOL TIP

A sharp mower blade cuts more grass in less time

A neat yard starts with a sharp blade. So make sure you sharpen the high-efficiency blade at the first sign of wear. Torn, gray-brown grass is one sign that your blade is getting dull with use. The LM400's 20" cutting diameter means its blade is designed to cut more grass with fewer passes. The blade can be resharpened or replaced as needed.

20" (51 cm) cutting width

Dual battery: Operates with 1 or 2 batteries

Side discharge

BL300 Blower

6.0 Ah = up to 120 min.

When running on lowest trigger setting 22 min. on full trigger 12 min. on turbo button Works with all Oregon batteries

Clear away large areas of leaves and debris quickly and easily with the BL300. The combination of superior air volume, (up to 507 cfm) and speed (up to 131.5 mph) make this the ultimate debris-clearing machine. The BL300's low noise rating, ergonomics, and portability make it an ideal tool for all-day jobs.

572619	Blower BL300 - Tool Only	\$159
572621	Blower Kit BL300 - A6 4.0 Ah Battery, Standard Charger	\$299
586646	Blower Kit BL300 - R7 6.0 Ah Battery, Rapid Charger	\$379

LOW NOISE

The BL300 offers a powerful, low noise solution to clean-up and debris removal. With only 64.6 dB (bystander measure) on Turbo mode, the BL300 allows you to get the job done without bothering your neighbors. Meets most community 65 dB noise regulations.

HIGH-PERFORMANCE

The innovative brushless motor and axial fan offer a powerful combination of performance and efficiency. The variable speed trigger allows the user to stay in complete control by only using the power required by the job.

ERGONOMICALLY DESIGNED

The BL300 is designed for extended use. The comfortable handle and shoulder strap make it ideal for large areas.

SPECIFICATIONS

- Only 8.9 lbs (with battery)
- Superior air volume (up to 507 cfm of air)
- Exceptional air speed (up to 131.5 mph)
- Variable speed trigger

TOOL TIP

Use your blower for more than just leaves

Replace your broom and rake in most cases. Easily clean up leaves and yard debris. Blow off the back deck, front porch, or garage. Remove build-up from gutters and drains. Quickly blow out pick-up truck beds and other machinery. The BL300 is quiet, powerful, light, and portable allowing you to use it almost anywhere.

Exceptional balance

Convenient built-in strap holes (strap included)

Turbo button and variable speed trigger

NEW Cordless Multi-attachment System

NEW Cordless Multi-attachment System

A versatile and powerful system designed for homeowners wanting to save time and money. The Oregon® Multi-attachment System puts you in charge — choose only the attachments you need and build a customized system for you and your yard. The Oregon attachments work seamlessly with the Powerhead, and the brushless motor delivers sustainable power. Within seconds, you can switch from pruning your trees to trimming the grass around your flower bed.

POWERFUL

- Brushless motor delivers more power and enhanced torque for higher efficiency.
- Plenty of power to trim and edge a large yard.
- Consistent lithium ion performance.

EFFICIENT

- A single power source no need to maintain multiple gas engines.
- Use any Oregon 40V MAX* battery.

VERSATILE

- One system that uses your choice of Oregon interchangeable attachments.
- Seamlessly switch from high-volume jobs to precision work.
- Swap out one tool for another within seconds.

STORABLE

- Takes up less space in your garage or shed.
- Fits easily in a truck bed or cargo space.
- Lighter weight makes it easy to move.

^{*}Fully charged battery voltage measured without a workload is 40 volts. Nominal voltage is 36 or 37 depending on battery used.

Trimmer / Edger

\$159

6.0 Ah = approx. 45-60 min. 4.0 Ah = approx. 30-40 min. 2.6 Ah = approx. 20-30 min.

Depending on material being cut and user technique Works with all Oregon batteries

Cut through tough vegetation and beautify your landscape; the ST275's patented gear drive technology allows you to do both. Equipped with the innovative Oregon® Gator® SpeedLoad™ head, you'll be able to replace your line as little as 20 seconds.

•	•	
582152	Trimmer / Edger ST275 - Tool Only	\$159
590498	Trimmer / Edger Kit ST275 - E6 2.6 Ah Battery Pack, Standard Charger	\$239
581207	Trimmer / Edger Kit ST275 - A6 4.0 Ah Battery Pack, Standard Charger	\$279
586726	Trimmer / Edger Kit ST275 - R7 6.0 Ah Battery Pack, Rapid Charger	\$379

US patent numbers 6,301,788 and 6,014,812 used under license.

2-IN-1 TRIMMER / EDGER

Switch quickly from trimmer to edger.

HIGH TORQUE AND POWER

Patented gear drive technology provides high performance and torque to cut through thick vegetation. The variable speed trigger allows the user to maintain control.

ERGONOMICALLY DESIGNED

Designed for comfort and extended use.

SPECIFICATIONS

- Only 9.4 lbs (with battery)
- 13" cutting diameter
- 6250 rpm no-load cutting speed
- · Variable speed trigger
- Gator SpeedLoad line disks, .080"

TOOL TIP

Make trimming effortless

Pull the trigger high or low enough to accommodate different jobs in your yard. A full trigger won't cut grass near a flower bed more precisely — just pull it high enough to cut the grass near the bed. Reserve full trigger trimming for the tougher vegetation you'll encounter in your yard. This will help extend the life of your trimmer line and make your trimming more efficient. The ST275's variable speed trigger allows you to remain in control of line speed.

Gator SpeedLoad

FAST

With a unique disk that simply pops into place, you can replace trimmer line as little as 20 seconds.

EASY

The innovative tongue-and-groove disk replaces the usual tangle of trimmer line and eliminates the frustrations usually associated with replacing line into the trimmer head.

DURABLE

Gator SpeedLoad disks last up to 2X longer than typical line. Which means you'll spend more time on the job and less time reloading line.

PS250 Pole Saw

6.0 Ah = up to 750 cuts4.0 Ah = up to 500 cuts2.6 Ah = up to 325 cuts

In 2"-3" material Works with all Oregon batteries

The PS250 gives you precision, power, and a telescoping reach for all trimming and pruning jobs. The shaft allows up to 14'-15' of access, while the premium battery pack and mid-mount motor provide you with the longevity and comfort for a long day's work.

563456	Pole Saw PS250 - Tool Only	\$249
563455	Pole Saw Kit PS250 - E6 2.6 Ah Battery, Standard Charger	\$329
563454	Pole Saw Kit PS250 - A6 4.0 Ah Battery, Standard Charger	\$389
586642	Pole Saw Kit PS250 - R7 6.0 Ah Battery, Rapid Charger	\$469

^{*}Based on estimate for a 5'10" (1.8 m) individual operating at a 60 degree angle +/- 18 degrees

EXTENDABLE REACH

Extend up to 10'2" (3.1 m) for a reach of up to 14'-15' (4.5 m) from the ground level.*

MID-MOUNT MOTOR

The mid-mount motor places the PS250's weight (and size) between your hands. This reduces the size of the cutting head — making it easier to reach hard-to-reach-cuts, and reduces the weight at the end of the pole — improving ergonomics and reducing fatigue.

ERGONOMICALLY DESIGNED

In addition to the mid-mount motor, the PS250 weighs only 13.5 lbs with the battery, which means better balance and less fatigue. A shoulder strap is included for additional comfort.

SPECIFICATIONS

- Only 13.5 lbs (with battery)
- Chain speed: 2817 fpm
- Micro-Lite™ 3/8 Narrow Kerf 90PX chain with 0.43" (1.1 mm) gauge
- 8" (20 cm) bar

TOOL TIP

How to properly cut tree branches

Let the Pole Saw reach full speed before making contact with the branch. Apply light pressure to prune lower limbs first, then move higher. Cut the ends of longer limbs first, and then prune the branch closer to the trunk.

Slim, compact head

Mid-mount motor

Adjustable collar

Branch hook

10

HT250

Hedge Trimmer

\$159

6.0 Ah = up to 150 min.4.0 Ah = up to 100 min.2.6 Ah = up to 60 min.

Depending on material being cut and user technique Works with all Oregon batteries

The HT250 is light enough for you to tackle tall and wide hedges as well as rows of smaller hedges. The laser-cut blades will cut neat and precise formations while maintaining the health of the plants.

551275	Hedge Trimmer HT250 - Tool Only	\$159
558812	Hedge Trimmer Kit HT250 - E6 2.6 Ah Battery, Standard Charger	\$239
585212	Hedge Trimmer Kit HT250 - A6 4.0 Ah Battery, Standard Charger	\$279
567040	Hedge Trimmer Kit HT250 - A7 4.0 Ah Battery, Rapid Charger	\$329

24" (60 cm) LASER-CUT BLADES

Laser-cut blades mean cleaner cuts and healthier plants.

ERGONOMICALLY DESIGNED

Large and comfortable handles.

SPECIFICATIONS

- Only 9.8 lbs (with battery)
- 2750 strokes per minute maximum cutting speed
- Cuts up to a 3/4" branch
- Low noise
- Variable speed trigger

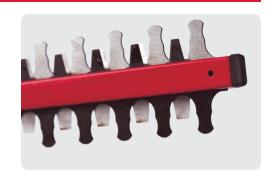

TOOL TIP

Keep your hedges in shape

The shape of your hedge can extend its longevity and health. For instance, hedges with an "A" shape allow sunlight to reach the lowest levels of the hedge. This promotes stronger roots and stems. The HT250 is light-weight, making sculpting easy.

Premium Blade Technology

Engineered with premium blade technology to outlast the competition. Rugged and durable, the HT250's blades are perfect for trimming and sculpting.

The Oregon® Portable Light keeps worksites illuminated well after the sun sets. Our unique power options give you the flexibility to choose between the included AC power cord or inserting an Oregon PowerNow Battery Pack.
